

SUCCESS SUMMARY

- 1 - Attitude is everything! The way in which you think and the way you approach anything in life will determine how successful you are. Adopt a positive, anything-is-possible attitude for success.
- 2 - Success is the only option! Create a standard for yourself that anything less than success is unacceptable. Do not have a plan B. The only acceptable outcome is success.
- 3 - Whatever it takes! There will be obstacles, setbacks and problems on your journey to success, and it won't be an easy journey. But it'll be worth it. Be willing to do whatever it takes for as long as it takes to reach your dreams.
- 4 - Become obsessed! Train yourself to spend every minute of your free time thinking about how you can be successful with your ideas and your business. A (healthy) obsession with your success will help you achieve it much faster.
- 5 - Failure is just a lesson! The most successful people have failed more times than you can count. Failure is not something to be ashamed of. Every time you fail, learn from that failure and do it better the next time. The more you fail, the more likely you are to succeed. You only ever fail when you give up for good.
- 6 - Always be learning! Keep reading, keep networking, keep investing in your own education. The more you know, the more likely you are to be successful.
- 7 - Work smart and work hard! Work your ass off, every single day. Be smart about how you work and follow proven systems and blueprints that allow you to get the maximum results from the effort you put in.

8 - Goal-setting and systems! Set goals 10x higher than you want to achieve and put in 10x more effort than you think you need to achieve those goals. Create systems to help you achieve those goals so you eliminate the need for measuring results on a daily basis. Create a system that you can trust to guarantee you results if you follow it religiously.

9 - Avoid negative influences! Cut out and distance yourself from all negative influences in your life. These are poisonous to your happiness and success. Adopt positive influences. Surround yourself with as many positive people, sources of motivation and positive influences as possible. Create a vision board. Write out your goals daily before you sleep and when you wake up.

10- Find your WHY! Find your purpose of why you are willing to work so hard and do whatever it takes, for as long as it takes to get results. Money should not be your WHY. There has to be a bigger reason than just money. Find that, and use it to inspire you and motivate you to chase your dreams, every single day.

11- Create a 'Success' routine! Plan your days in advance, prioritize the most important tasks, schedule your time and track your activities. Allocate time for reading, learning and networking. The more you hone your routine to drive you to success, the more likely it is that you will succeed. Create habits that give you no other option but to be successful in the long run.
